Professional Summary

Software Engineering graduate with hands-on experience in web development, data science, and full-stack solutions. Passionate about leveraging cutting-edge technologies to build efficient, user-focused applications that solve real-world challenges. Proficient in Web development, React, Node.js, and data-driven methodologies, with a proven ability to collaborate effectively in team environments and deliver impactful results. Eager to contribute to dynamic projects, continuously improve technical skills, and add value to forward-thinking organizations.

Work Experience

Code Desk Studio

Onsite

June– Sep 2025

- Backend Developer
 - Developed backend for production app and websites using javascript and Node.js.
 - Contributed to multiple projects, collaborating with frontend and backend teams, while gaining basic frontend design knowledge. and actively contributing to daily meetings for updates and issue resolution.

Projects ([Github](#))

- Connect & Learn** **React, Node, Express, Mongodb, Tailwind css**
Web-Developer Jan 2025 - Sep 2025
 - Developed Connect and Learn benefits users by offering collaborative learning, skill exchange, personalized tutoring, real-world project opportunities and innovative project ideas space.
 - The platform serves as an innovation hub, fostering creativity and creating a connected ecosystem for users to engage, excel, and advance their educational and professional pursuits.
- Online blood donation request portal** **React.js,Mongodb,node.js**
Web-Developer Aug 2025 - Dec 2025
 - Developed an online blood donation request portal using React.js, Node.js, and MongoDB, enabling donors and recipients to manage blood requests and donations through a responsive web interface.
 - Implemented role-based access control for four user roles (Donor, Recipient, Medical Admin, System Admin) with dedicated dashboards and secure authentication/authorization..
- Finance Tracker Web** **React.js,Angular,mongodb,node.js**
Web-Developer Nov 2025 - Dec 2025
 - Built a Finance Tracker web application with a modern UI using React.js and Angular, enabling users to record income/expenses, categorize transactions, and view spending summaries.
 - Developed a scalable backend using Node.js and MongoDB, designing RESTful APIs for secure CRUD operations, filtering, and reporting.
 - Implemented data validation and optimized API performance to ensure accurate financial tracking and smooth user experience.
- Task Manager App**
App-Developer Jan 2025 - April 2025
 - Developed a cross-platform Task Manager mobile app using Flutter, allowing users to create, update, and organize tasks with due dates and priority levels.
 - Implemented core features such as task status tracking (To-Do/In Progress/Done), reminders/notifications, and a clean, responsive UI for Android and iOS.
- University Complaint mgt System**
App-Developer
 - Designed and developed a University Complaint Management System mobile application using Flutter, allowing students to safely register and submit complaints/requests against departments, faculty, teachers, or HODs.
 - Developed role-based workflows for assigning, reviewing, escalating, and resolving complaints, with real-time status updates and notifications.

Skills

Web Development (.Node JS, React JS, Next JS, Angular JS, MVC Architecture, Rest APIs, Tailwind CSS) **Programming Languages** (C++,Basics of Python, JavaScript, Mongodb)

Education

Comsats University Islamabad(Vehari campus), B.S Software Engineering (CGPA 2.8/4) 2022 – 2026
Relevant Coursework (OOP's, Data Structures, Database Systems, Software Design & Analysis, Web Programming, Data Science, Information Retrieval)

Hobbies and Interests

- Cars Addiction
- Photography
- Traveling
- Cricket
